## ENHANCING QUALITY OF LIFE THROUGH THE ART OF PROSTHETICS

Since 1991, Prosthetics at Graphica Medica has provided facial prostheses to patients in Minnesota and the 5-state area including Iowa, Nebraska, North and South Dakota, and Wisconsin. Today, we offer both facial and somatic prosthetic treatment to patients nationally and internationally.

Anaplastologists and ocularists at Prosthetics at Graphica also collaborate with physicians and research teams for unique design projects, such as surgical templates or medical models.

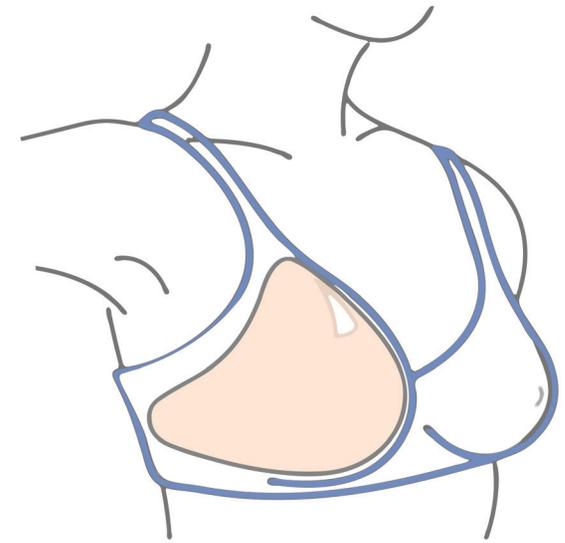

### FACIAL

### HAND & FOOT

### BREAST

## CUSTOM FACIAL & SOMATIC PROSTHETICS

Prosthetics at Graphica Medica offers high-quality, custom prostheses to restore all or part of the face, hands, feet, or chest wall.

These prostheses provide patient-tailored solutions to living with the long-term effects that may result from trauma, disease, or congenital malformations.

Our staff of clinical anaplastologists is committed to enhancing quality of life through the art of prosthetics with the highest level of respect for our patients.

**CUSTOM DESIGN SOLUTIONS CAN RESTORE SYMMETRY, SUPPORT GLASSES AND HEARING AIDS.**

**PROSTHESES HELP TO PROTECT SENSITIVE SKIN & NORMALIZE BREATHING AND SPEECH.**

**CUSTOM FIT & RETENTION ARE DETERMINED TO BEST SERVE YOUR LIFESTYLE.**

We provide consultation, treatment planning, and prosthetic restoration for children and adults.

### CUSTOM SILICONE PROSTHESES

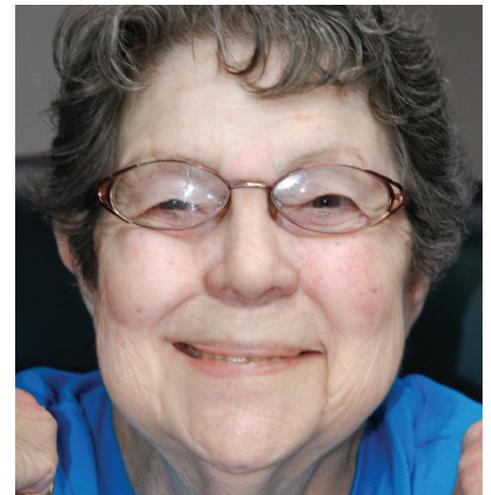

- Ear (auricular)
- Nose (nasal, midfacial)
- Eye (orbital, upper facial, hemifacial)
- Finger and partial hand
- Toe and partial foot
- Breast

### ADDITIONAL SERVICES

- Surgical templates for implants
- Medical models
- Research opportunities

Patients who may be served by a custom prosthesis include, but are not limited to, those affected by:

- Microtia
- Hemifacial microsomia
- Treacher Collins Syndrome
- Head/Neck tumor
- Squamous or Basal Cell Carcinoma
- Traumatic injury
- Burns
- Breast Cancer
- Poland Syndrome

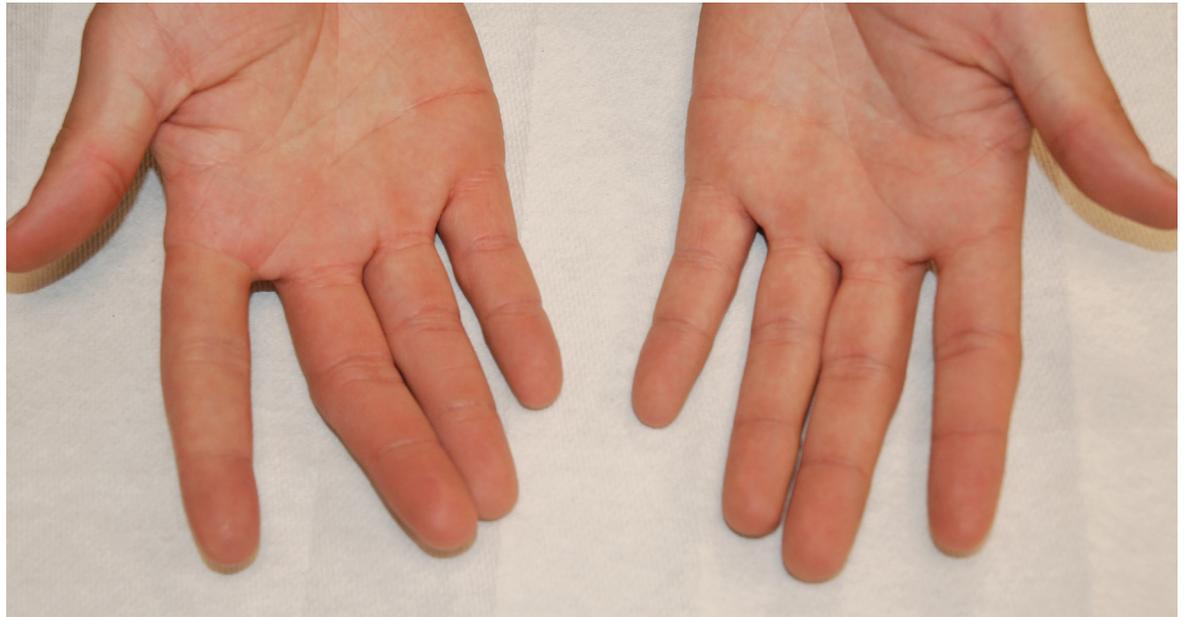

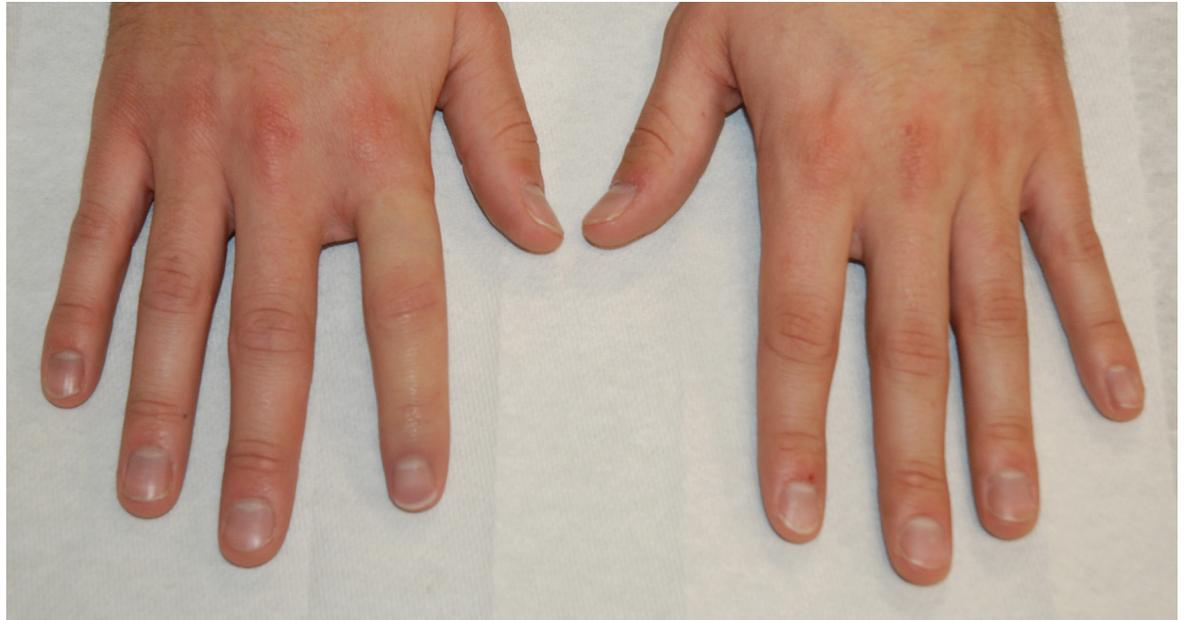

## CUSTOM PARTIAL HAND & FEET PROSTHESES

We offer prosthetic solutions for patients missing fingers, toes, or other partial anatomy of the hand or foot.

These medical-grade silicone prostheses are designed to restore appearance and some function using a multistep fit test approach that is unique in the field of partial hand and foot prosthesis.

We employ materials capable of sustaining long-term comfort and functional fit.

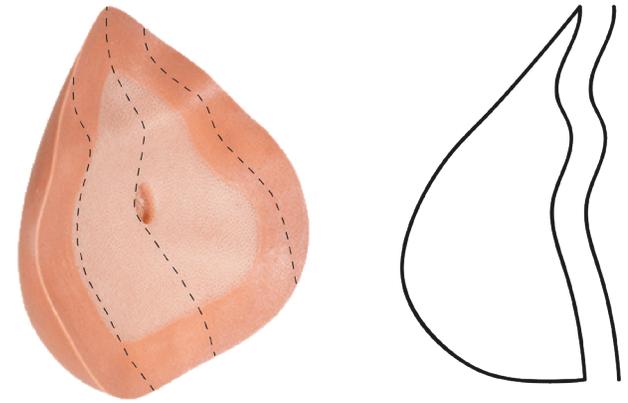

Our design process combines artistic and anatomical training with a digital design workflow that maximizes our accuracy and quality.

## CUSTOM BREAST PROSTHESES

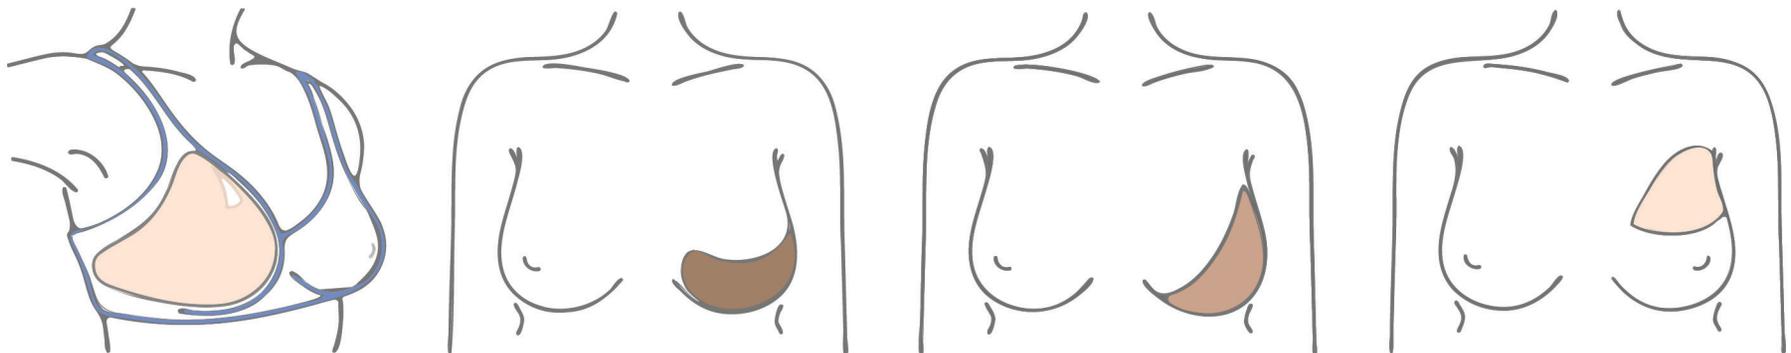

Custom breast forms vary from non-customs in that they are designed to intimately follow the unique contours of an individual's chest wall, so that the back side of the prosthesis positions in place like a puzzle piece.

They are intended to be worn directly against the skin, not within the pocket of a mastectomy bra.

Custom breast forms are intended to restore symmetry and the physical appearance of one's breast when worn with a bra and clothing.

Custom forms may be designed to restore only partial areas of the chest or breast tissue, accounting for asymmetries that may result occur following mastectomy, breast-conserving surgery, or reconstruction.

Please contact us if you have any questions about how our services may benefit your patients.
